

Sadid Industrial Group
since 1963

Introducing the capabilities of Sadid Industrial Group

*Public Relation and
Market Development Department
February 2022*

Introduction Of Sadid Industrial Group

Sadid Industrial Group is one of the largest private sector companies in the Islamic Republic of Iran, which is established in 1963. With more than 58 years of experience in different fields of the industry, SADID has played a very important role in the development of national projects of Iran along with several prominent manufacturing, contracting and service subsidiaries.

Its human resources, including more than 2,000 experts and engineers, has been the leaders of value and synergy creation.

Its subsidiaries have been key players in various fields including oil and gas sector, water and wastewater industries, petrochemicals plants, steel mills, renewable energy sector and financial markets.

Sadid Industrial Group has implemented and finalized some of the important national projects and paved the way for the development of the country.

Sadid Industrial Group products, services and capabilities:

- Production of thick and large diameter steel pipes for oil, sour & sweet gas and water transmission lines in the range of 20 to 128 inches.
- EPC Contractor of Oil, Gas, Petrochemical, Water and wastewater industries.
- Engineering and manufacturing of the centrifuged pumps used in the Oil, Gas, Petrochemical and power plants, water and wastewater industries.
- Design and construction of various on shore and off shore structures (such as Rigs, platforms and jackets) and execution of On Shore- Off shore drilling projects.
- Operation and maintenance (O&M) projects of refineries, submarine oil pipeline projects and single point mooring installation.
- Design and manufacturing of the Wind turbines and development of the wind power farms as a turnkey contract.
- General contractor (GC) in the designing and construction of Thermal power plants, combined cycle and hydro power plants.
- Management and Implementation of oil and gas field development projects focusing on upstream activities.
- Design and construction of steel mills and sugar cane treatment facilities.
- Supply chain optimization and procurement services for variety of sectors.
- Brokerage and investment in the Iranian stock market.

A picture of the specialized activities of the subsidiaries of Sadid Industrial Group

Mahshahr Pipe Mill Manufacturing Company

MAHSHAHR PIPE CO.

Production of thick steel pipes by direct welding method, from 24 to 56 inches in diameter and using thick steel sheets up to grade-70X, up to 35.5 mm thick, with a length of 12.2 m and a maximum weight of 15 tons, for oil and gas transmission lines. Sour and sweet with a nominal capacity of 350,000 tons per year based on domestic IGS and IPS standards and international standards such as API and DNV and also benefiting from the best equipped laboratory based on ISO / IEC 17025: 2017 certification to perform all the various tests required.

SABA NIROO Co.

Saba Niroo Knowledge Foundation Company

Design and manufacture of 660 and 710 kW wind turbines with the technology of Vestas Denmark and Ingeteam Spain, installation, commissioning, overhaul and after-sales service and the ability to manufacture a variety of general and advanced composite molds and parts.

PUMP & TURBINE CO.

Petco Pump and Turbine Knowledge-Based Company

Design and manufacture of centrifugal pumps under international standards such as 610 API including types OH2, OH3, BB1, BB2, BB4, BB3, BB5, VS1, VS4, VS6, VS7 for applications in oil, gas, refinery, petrochemical, power plant, mineral and pipeline and water transmission industries and the largest manufacturer of fire packaging packages according to NPA standard 20 And manufacturer of small water turbines under 3 megawatts of Francis, Kaplan, PAT type and has a certificate of pump testing qualification from the National Standard Organization of Iran due to having the largest advanced and equipped pump testing laboratory in the Middle East and one of the official sources of water and process pump testing in Country and partner laboratory, with the National Standard Organization of Iran.

Marine Structures Development Company

Design and construction of various oil structures (rigs, platforms and jackets) and perform all contracting work in Off Shore and Shore On projects, operation and maintenance of refineries, submarine oil pipelines and floating ball projects and having a contractor certification certificate. Oil and gas base one, five facilities and equipment base and five water base, certification certificate of service and repair companies for O&M projects and safety qualification certificate.

Gostaresh Steel Industries Company

General Contractor (GC) in the field of mining, steel, oil, gas, petrochemical, building and power plant projects and has a certificate of contracting competency in the field of industry and mining, in the field of facilities and equipment and in the field of buildings and structures.

TAVAN BAAD Co.

Tavan Baad Company

Development and construction of wind turbine farms as turnkey using engineering and executive facilities in order to have a good share of the renewable energy market.

SADID TADBIR Co.

Sadid Tadbir Company

Investing in the stock exchange and OTC.

Tavan Power Plant Development and Construction Company

General Contractor (GC) in the field of construction of power plants by EPC method and participation in power plant projects including thermal power plants, combined cycle, hydropower and new energy.

Sadid Oil and Gas Development Company

Management and implementation of oil and gas field development projects focusing on upstream activities and creating a consortium with the participation of companies active in the field of oil and gas.

SADID P.E. Co.

Sadid Engineering Supply Company

Optimizing the supply chain and creating synergies in business activities and supply of raw materials, technology, technical and engineering services required by companies affiliated to Sadid Industrial Group.

FALEGH SANAAT Co.

Falegh Sanaat Company

General Contractor (GC) in the implementation of industrial projects by EPC method in the field of construction of sugar factories, oil and gas and petrochemical industries, water and wastewater, as well as the implementation of cement factories.

SADID PIPE & EQUIPMENT Co.

Sadid Pipe and Equipment Company

Production of thick steel pipes by spiral method from 20 to 128 inches in diameter using thick steel sheets with grade st 37 to X70 and in thicknesses of 6.3 to 25.4 mm, with a length of 8 to 18 meters for water and gas transmission lines, with a capacity of 300 thousand tons per year And the ability to implement external and internal coating of pipes from 500 to 2400 mm in diameter with a total annual capacity of 5 million square meters.

The most important completed projects

- Developing Several thousand kilometers of oil, gas, and water pipelines throughout the country
- Manjil and Binaloud Wind Power Farms (Wind turbines of 660 and 710 KW)
- Developing seven sugar cane factories throughout the country
- Designing and constructing Milad Tower head structure and antenna mast (the 4th tall communication tower of the world)
- Constructing the biggest Middle East jacket on the Persian Gulf
- The sole manufacturer of wind turbines throughout Iran
- Producing various vertical and horizontal centrifugal pumps for the water industries up to 2000 qm/h
- One hundred thousand ton floating ball installation (SPM) project in Siraf port with the employer of Fajr Jam Refining Company
- Export of 200 km of 56-inch thick steel pipes to neighboring countries
- Construction of pipelines for the Persian Gulf water transmission line project to the Central Plateau
- Construction of part of thick steel pipes of Goreh to Jask sour oil transmission line

The most important ongoing projects

- Contract for design and production of 34, 710 kW wind turbines by Saba Niroo Company
- Execution of contracts for the construction of thick steel pipes for various projects of oil and gas transmission lines by Mahshahr Pipe Manufacturing Company
- Design and construction of 10 electric pumps for Goreh to Jask sour oil pipeline project, Dehloran petrochemical water supply project and general service pumps for the first station of crude oil transfer from Goreh to Jask, and pumps and turbines for various industries by Petco
- Execution of repair and maintenance contracts and supply of equipment and spare parts for wind turbines in wind farms built such as Manjil, Herzville, Siahpoosh, etc. by Saba Niroo Company
- Project of changing and equipping the wharves 16 and 17 of the petrochemical port in Assaluyeh in the form of EPCC, three contracts for the industrial operations of the refinery Sixth and Ninth South Pars and Fajr Jam Refinery (O&M) by Tasdid Company
- shadegan steelmaking project Execution of eight hundred thousand ton steel project for billet production
