

**SADID INDUSTRIAL GROUP**  
SINCE 1963

**Sadid Industrial Group**, with more than 50 years of experience and a distinguished history in Iran's industrial sector, is recognized as one of the country's foremost industrial conglomerates. The Group operates across a broad spectrum of strategic industries including oil, gas, refining, petrochemicals, steel, and water.

Backed by 13 subsidiary companies, SADID encompasses a comprehensive ecosystem of manufacturing plants, engineering and contracting firms, and commercial enterprises. These subsidiaries collectively enable the Group to deliver end-to-end industrial solutions in the following key areas:

- Manufacturing of large-diameter steel pipes for oil, gas, and water transmission lines
- Design and construction of offshore structures
- Refinery maintenance, repair, and overhaul services
- Engineering and production of industrial mega pumps for oil, gas, refining, and petrochemical applications
- Manufacturing and Development of high-capacity hydroelectric and wind turbines
- Construction of sugar extraction plants from sugarcane
- Execution of power plant and integrated steel production projects

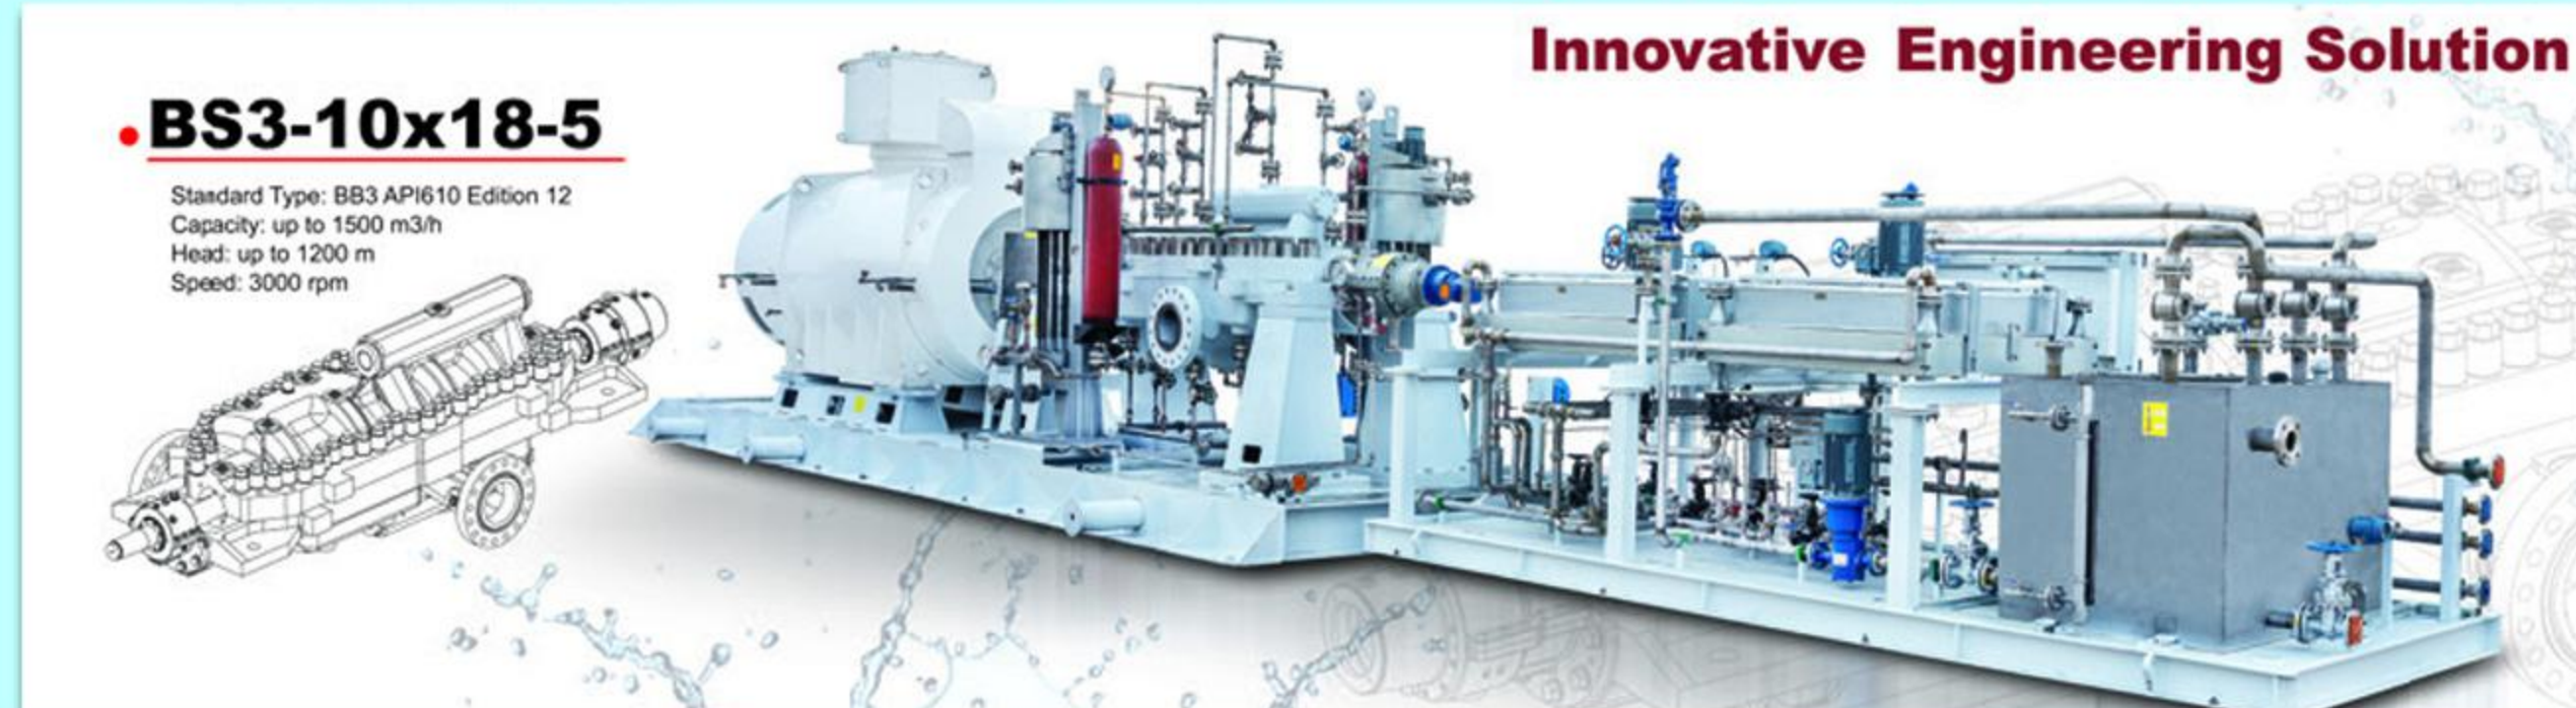

With a highly qualified team of engineers, specialists, and technical experts, SADID Industrial Group is deeply committed to advancing Iran's industrial infrastructure and executing projects of national significance.

Driven by Iran's unique strategic position in the energy sector, the urgent need for modern water and power infrastructure, and the global transition toward renewable and clean energy, the Group has structured its business operations around these pivotal priorities. Through this strategic orientation, SADID continues to play a vital role in sustainable development and long-term value creation for society.

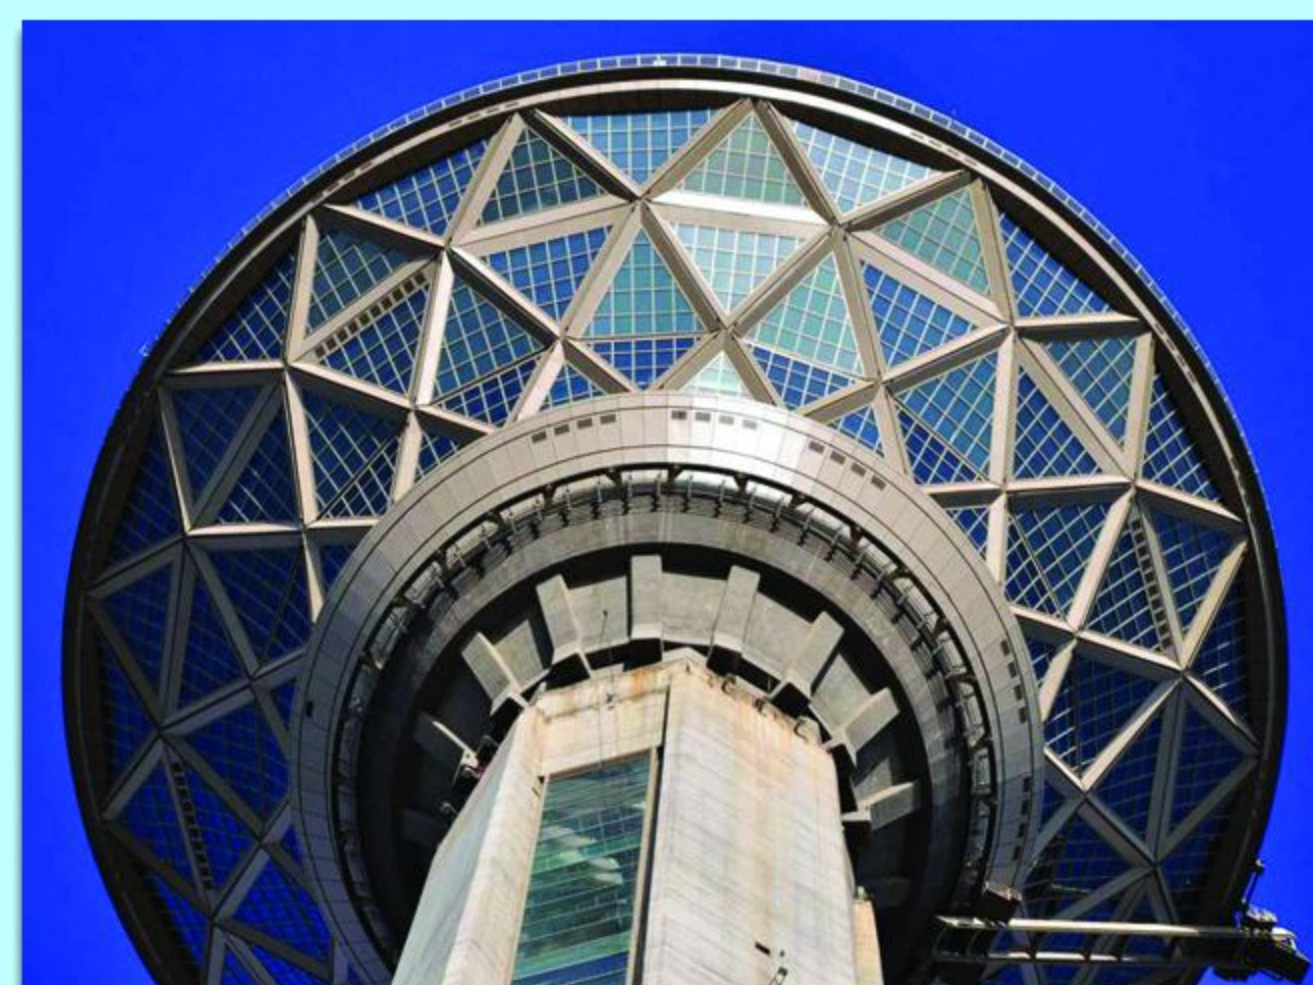

## Some Projects implemented of Sadid Industrial Group

▲ Design, construction, transportation, and installation of various offshore structures in different oil fields in the Persian Gulf, including the P4 jacket weighing 4,400 tons in the Reshdad oil field.

▲ Design and production of advanced and large-scale pumps for the crude oil pipeline from Goreh to Jask.

Design and manufacturing 660 and 710 kW wind turbines in various regions of the country, as well as the installation of megawatt turbines.

Pipe manufacturing for the Goreh-Jask project, onshore sour service gas pipelines for the South Pars oil field, as well as exporting the gas transmission pipes to neighboring countries.
